WORK HISTORY

Freelance Web Developer

Apr 2016 – Jan 2018

- Worked directly with clients providing a wide-range of services. In addition to development, I provided guidance establishing a purpose, determining content conventional to the industry, constructing visual layouts concordant with modern trends and providing essential consultation informing client of web related options including domain registration, hosting and email.
- Created useful web applications as a tool for supporting operations at my current employment.

Chemical Lab Technician/Supervisor

Mar 2011 - Present

Tulsa Metal Finishing

- Manage full operation of process control with direct involvement in process and chemistry related troubleshooting.
-
